Low Pass Filter

DC to 52 MHz **50**Ω

The Big Deal:

- Small size 3.2mm x 2.5 mm
- High Power handling (8W)
- High rejection (50 dB typ)
- Ceramic construction

Product Overview:

New Low Pass Filter LFCV-52+ is an LTCC based 7 section design, that extends the lower frequency cutoff range of the existing LFCN series to 52 MHz. Systems that previously relied on active or lumped element filtering to support these lower frequencies can save power and system complexity by integrating the LFCV-52+ into new designs. These filters are offered in a EIA 1210 package size and have a typical stop band rejection of 50 dB.

| Summary Performance | | | | | |
|----------------------------|-------------|---------|--|--|--|
| Insertion Loss (Pass band) | 1.2 dB Max. | 52 MHz | | | |
| Return Loss (Pass band) | 20 dB Typ. | 52 MHz | | | |
| Stop band Rejection | 20 dB Min. | 140 MHz | | | |
| Stop band Rejection | 50 dB tvp. | 180 MHz | | | |

Key Features

| Feature | Advantages |
|----------------------------|---|
| Small Size (3.2mm x2.5 mm) | Available in the size of typical resistors or capacitors (EIA 1210), the ultra small LFCV series integrates up to 7 low pass sections in a simple SMT chip form factor. |
| High Power Handling | The LFCV series can withstand up to 8W CW signal without damage making this filter ideal for use in medium power to transmit paths. |
| Temperature Stability | Over a 155°C operating temperature range (-55°C to +100°C), the LFCV series ceramic filters typically exhibit less than 0.2 dB pass band insertion loss variation, and less than 0.4 dB rejection variation at the 20 dB point (as measured on a single unit) |
| High Rejection | Achieving 50dB rejection @180 MHz; the LFCV-52+ provides a versatile anti aliasing solution for high data rate receivers. |

Notes

A Performance and quality attributes and conditions not expressly stated in this specification document are intended to be excluded and do not form a part of this specification document. B. Electrical specifications and performance data contained in this specification document are based on Mini-Circuit's applicable established test performance criteria and measurement instructions. C. The parts covered by this specification document are subject to Mini-Circuits standard limited warranty and terms and conditions (collectively, "Standard Terms"); Purchasers of this part are entitled to the rights and benefits contained therein. Demo Board MCL P/N: TB-526+ Suggested PCB Layout (PL-307)

Notes

Features

- excellent power handling, 8.5W
- small size
- 7 sections
- temperature stable
- hermetically sealed • protected by U.S. Patent 6,943,646

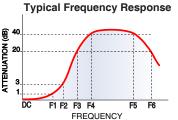

Applications

- harmonic rejection
 VHF/UHF transmitters/receivers • anti-aliasing for A/D converter

Electrical Specifications^{1,2} at 25°C

| Pa | rameter | F# | Frequency (MHz) | Min. | Тур. | Max. | Unit |
