

Xinger®

Ultra Low Profile 0404 Balun 50Ω to 100Ω Balanced

Description

The BD3150N50100A00 is a low cost, low profile sub-miniature unbalanced to balanced transformer designed for differential inputs and output locations on modern chipsets in an easy to use surface mount package covering the MMDS and the low end of the UWB frequency range. The BD3150N50100A00 is ideal for high volume manufacturing and delivers higher performance than traditional ceramic baluns. The BD3150N50100A00 has an unbalanced port impedance of 50Ω and a 100Ω balanced port impedance. This transformation enables single ended signals to be applied to differential ports on modern integrated chipsets. The output ports have equal amplitude (-3dB) with 180 degree phase differential. The BD3150N50100A00 is available on tape and reel for pick and place high volume manufacturing.

Detailed Electrical Specifications: Specifications subject to change without notice.

Features:	Parameter	ROOM (25°C)			Unit
		Min.	Typ.	Max	
• 3100 – 5000 MHz	Frequency	3100		5000	MHz
• 0.65mm Height Profile	Unbalanced Port Impedance		50		Ω
• 50 Ohm to 2 x 50 Ohm	Balanced Port Impedance		100		Ω
• Low Insertion Loss	Return Loss	16	21		dB
• UWB & MMDS	Insertion Loss*		0.6	0.7	dB
• Surface Mountable	Amplitude Balance		0.8	1.3	dB
• Tape & Reel	Phase Balance		3	7	Degrees
• Non-conductive Surface	CMRR		26		dB
• RoHS Compliant	Power Handling			1	Watts
	Operating Temperature	-55		+85	°C

* Insertion Loss stated at room temperature (Insertion Loss is approximately 0.1 dB higher at +85 °C)

Outline Drawing

Typical Performance: 3000 MHz. to 5100 MHz.

Return Loss - Input

Insertion Loss

Amplitude Balance

Phase Balance

CMRR

Wide Band Performance: 500 MHz. to 8500 MHz.

Mounting Configuration:

In order for Xinger surface mount components to work optimally, the proper impedance transmission lines must be used to connect to the RF ports. If this condition is not satisfied, insertion loss, Isolation and VSWR may not meet published specifications.

All of the Xinger components are constructed from ceramic filled PTFE composites which possess excellent electrical and mechanical stability having X and Y thermal coefficient of expansion (CTE) of 17 ppm/°C.

An example of the PCB footprint used in the testing of these parts is shown below. An example of a DC-biased footprint is also shown below. In specific designs, the transmission line widths need to be adjusted to the unique dielectric coefficients and thicknesses as well as varying pick and place equipment tolerances

With No DC Bias	With DC Bias
 3X .011 [0.29] .008 [0.21] 3X .011 [0.29] .014 [0.36] .020 [0.50] 3X Transmission Line .020 [0.50] Plated thru hole to ground .008 [0.21] Legend: Circuit Pattern Footprint Pad (s) Solder Resist Dimensions are in Inches [Millimeters] Mounting Footprint	 3X .011 [0.29] .008 [0.21] 3X .011 [0.29] .014 [0.36] .020 [0.50] 3X Transmission Line .020 [0.50] Plated thru hole to ground .008 [0.21] Legend: Circuit Pattern Footprint Pad (s) Solder Resist Dimensions are in Inches [Millimeters] Mounting Footprint

Packaging and Ordering Information

Parts are available in reel and are packaged per EIA 481-2. Parts are oriented in tape and reel as shown below. Minimum order quantities are 4000 per reel. See Model Numbers below for further ordering information.
