R422C mm-Wave Planar-Doped Barrier Detector

Data Sheet

26.5 to 40.0 GHz

Outstanding Performance

The Planar-Doped Barrier (PDB) diode technology combines the best characteristics of point-contact and low barrier Schottky to provide exceptional performance. This PDB diode technology provides detectors with broadband flatness, excellent square-law response, and low SWR.

These specifications along with the rugged design of the detector make it an excellent value.
