

## A Tallysman Accutenna™ TW3600 Permanent Mount Iridium™ Antenna

The TW3600 employs Tallysman's unique *Accutenna™* technology in a permanent mount, passive right hand circularly polarised antenna for the 1616 to 1626.5 MHz frequency band, specially designed to maximise the performance of Iridium™ voice and data modems.

The TW3600 features a high performance dual-feed patch element that provides great axial ratio (3dB max) over the entire Iridium™ frequency band, thus signals at the band edges remain truly circular, unlike the response of single feed antennas.

The TW3600 is housed in a permanent mount industrial-grade weather-proof enclosure and comes with a TNC Jack (female) connector, allowing for the Iridium™ modem to be mounted out of the elements and reach, and still providing excellent Iridium™ signal coverage.
