## The Big Deal

- Capable of 100 million cycles
- Wide frequency (DC to 18 GHz )
- High power, 10W
- 3 SPDT electromechanical, absorptive, RF switches (Isolation 85 dB typ.) configurable into a SP4T switch
- USB HID device, includes control software with an API DLL com object compatible with 32/64 Bit operating systems

Case Style: LM1625

Installation CD

## Product Overview

Mini-Circuits' USB-3SPDT-A18 is a general purpose USB controlled RF switch matrix containing three electro-mechanical SPDT, absorptive fail-safe RF switches constructed in break-before-make configuration and powered by $+24 \mathrm{~V}_{D C}$ with a switching time of 25 mSec typical. The three switches can be set up as: three independent SPDT switches, one SPDT and one SP3T switch, a single SP4T switch, or other configurations (see page 5 for details). The RF switches can be operated in all these configurations remotely using the supplied GUI program, or programmed by the user using the included API DLL com object. The RF switches operate over a wide frequency band from DC to 18 GHz , have low insertion loss ( 0.2 dB typical) and high isolation (85dB typical) making the switch box perfectly suitable for a wide variety of RF applications.

The USB-3SPDT-A18 is constructed in a metal case (size of $4.5^{\prime \prime} \times 6.0^{\prime \prime} \times 2.25$ ") with 9 SMA(F) connectors (COM, 1, 2 for each switch), a 2.1 mm DC socket, and a USB type B port. The model is supplied along with a CD containing a graphical user interface program featuring an API DLL com object. Also included is a 2.7 ft . USB cable, 2 SMA Male/ SMA Male coaxial semiflex cables for configuring the switch matrix, and a power adapter suitable for US, EU and other power systems, see page 6 for details. Longer USB cables and a mounting bracket are available as additional accessories.

## Key Features

| Feature | Advantages |
| :--- | :--- |
| USB HID (Human Interface Device) | Plug-and-Play (no need to install a driver for the device). |
| RF SPDT Electromechanical switch | Wideband (DC to 18 GHz ) with low insertion loss ( 0.2 dB typ.), very high isolation (85dB typ.), and high <br> power rating (10W cold switching) |
| $24 \mathrm{~V}_{\text {DC }}$ Operating voltage | The USB-3SPDT-A18 requires $24 \mathrm{~V} / 750 \mathrm{~mA}$ to power the RF switches, supplied from the included <br> power adapter. |
| $32 / 64$ Bit operating systems | Compatible with Windows ${ }^{\circledR}$ and Linux ${ }^{\circledR}$ operating systems using 32 and 64 bit architecture. |
| Software CD, USB cable, $24 \mathrm{~V}_{\text {DC }}$ Pow- |  |
| er adapter, and RF cables included |  | | A CD containing a programing manual for Linux ${ }^{\circledR}$ and Windows ${ }^{\circledR}$ operating systems (32 and 64 |
| :--- |
| bit systems) and a Windows ${ }^{\circledR}$ GUI program containing an API DLL com object is included with the |
| USB-3SPDT-A18. A 2.7ft. USB cable, a set of two coaxial semiflex RF cables, and a power adapter |
| suitable for US, EU and other power systems are also included. |

## $50 \Omega$ DC to 18 GHz

## Features

- Capable of 100 million cycles
- Three DC to 18 GHz SPDT absorptive fail-safe RF switches
in break-before-make configuration
- Configurable into SP4T or SP3T switches
- Electromechanical switching (Isolation 85 dB typ.)
- High power handling, 10W
- Greatly simplifies complex switching and timing setups
- Easy installation and operation
- Compatible with $32 / 64$-bit Windows ${ }^{\circledR}$ or Linux ${ }^{\circledR}$ operating systems, as well as LabVIEW ${ }^{\circledR}$, Delphi ${ }^{\circledR}$, C++, C\#, Visual Basic ${ }^{\circledR}$, and .NET software ${ }^{1}$
- Friendly Windows ${ }^{\circledR}$ Graphical User Interface
- Mounting bracket (Optional)
- protected by US Patents 5,272,458; 6,414,577; 6,650,210; 7,633,361 and 7,843,289

## Applications

- Lab
- Test equipment
- Control systems
- Switching a device in and out of a signal path

| Model No. | Description | Price | Qty. |

${ }^{2}$ Power On Sequence. Connect the 24 V power, followed by the USB control before turning on the Switch Matrix.
${ }^{3}$ Capable of up to 100 million cycles with proper maintenance, contact Mini-Circuits.
${ }^{4}$ Exceeding these limits will result in reduced life.
${ }^{5}$ Power handling is specified with RF applied to the COM port and output load connected to either 1 or 2 of the respective switch.

## Minimum System Requirements

| Interface | USB HID |
| :---: | :---: |
| Host operating system | 32 Bit operating system: Windows $98^{\circledR}$, Windows $\mathrm{XP}{ }^{\circledR}$, Windows Vista ${ }^{\circledR}$, Windows $7{ }^{\circledR}$ <br> 64 Bit operating system: Windows Vista ${ }^{\circledR}$, Windows $7{ }^{\circledR}$ Linux ${ }^{\circledR}$ support: 32/64 Bit operating system |
| Hardware | Pentium ${ }^{\circledR}$ II or better |

Absolute Maximum Ratings

| Operating Temperature | $0^{\circ} \mathrm{C}$ to $40^{\circ} \mathrm{C}$ |
| :--- | :---: |
| Storage Temperature | $-15^{\circ} \mathrm{C}$ to $45^{\circ} \mathrm{C}$ |
| DC Voltage max. | 26 V |
| RF power (at COM port of any switch) | 10 W |
| RF power (at 1 and 2 of any switch) | 1 W |

## Configuration options

- Power handling is specified with RF applied to the COM port and output load connected to either 1 or 2 of the respective switch.
- When connecting a coaxial semiflex cable, tighten connectors alternately using an $8 \mathrm{in} / \mathrm{lb}$ torque wrench to insure proper contact at each end.
